

Junior School

Year 7

History

In Year 7 students will be introduced to the world of History. They will come to understand how past events have shaped the world we know today. Students will look at evidence from that era to come to an understanding of what life was like in these times. Students will compare Ancient Societies' daily life, social features and government with people in the modern world.

Geography

Year 7 students will examine how and why places around the world are similar or different; the ways in which environments have influenced the development of people and their lands; and how humans have affected the environment.

Year 8

Economics

Students will investigate the different ways of managing financial resources and the decisions the government makes on economic matters. Students also investigate how goods and services are produced in Australia and the world of work and its development in our society.

Geography

Students undertake the study of climate and weather at a local and world scale and investigate climate based disasters.

History

Students study the Middle Ages and the Renaissance. As well as studying how people lived in these times, students come to see the reasons why certain events in world history occurred and how they helped shape the world we know today. Students compare Medieval Societies (daily life, social features and government) with the modern world.
